- Angular
- Tailwind
- Astro

BACKEND

- NodeJS
- Django
- Sequelize
- Express
- MySQL
- MongoDB

Languages

- Native Spanish
- Native Valencian
- Intermediate Inglish

About me

As a Full Stack developer, I have gained solid skills in both Front-End, primarily working with React, and Back-End, utilizing Node.js and Python.

Although I began my professional career in a different industry, specifically in Industrial Robotics, it provided me with insights into the programming world, leading me to make a professional transition. My commitment to continuous improvement motivates me to consistently expand my knowledge and make valuable contributions to the field of web development.

I consider myself a problem solver, as evidenced in my career by tackling challenges such as industrial process automation and self-directed learning to address issues in unfamiliar areas.

Education

Full Stack Web Developer (BOOTCAMP)
EDEM - The Bridge
May 2023 - August 2023
480 hours of internship in Full Stack Web Development, where I acquired knowledge in the best practices and leading technologies in the job market.

Python Certification (BOOTCAMP)
Tokyo school
October 2023 - January 2024
400 hours of general Python programming, web development frameworks such as Django and Flask, and data manipulation tools such as Pandas and NumPy among the highlights.

Advanced Technician in Multiplatform Applications Development
Campus Centre D'estudis
June 2020

Electrical and automatic installations technician
Escuelas Profesionales Luís Amigó
June 2018
